GEMINI BUILDS IT! & SHOWCASE ACRYLICS

CNC Programmer / Cabinetry & Millwork Designer

Gemini Builds It is seeking a skilled and motivated CNC Programmer / Cabinetry & Millwork Designer with strong woodworking and carpentry experience. This hands-on role combines design, CNC programming, fabrication, and problem-solving to bring custom projects from concept through production.

The ideal candidate enjoys building things, solving challenges, and finding better ways to manufacture custom projects. They are equally comfortable developing designs and CNC toolpaths as they are working with woodworking machinery on the shop floor, bringing ideas to life in a fast-paced manufacturing environment.

Key Responsibilities:

- Create CNC programs and toolpaths for custom woodworking and fabrication projects.
- Set up, operate, and troubleshoot CNC routers and related equipment.
- Interpret drawings, sketches, and customer concepts to develop manufacturable solutions.
- Participate in concept development, rendering, prototyping, and product design.
- Select appropriate materials and machining methods to achieve quality and efficiency goals.
- Perform machine setup, tooling changes, calibration, and routine maintenance.
- Assist with woodworking, carpentry, assembly, finishing, and general shop production as needed.
- Inspect finished components to ensure dimensional accuracy and quality standards are met.
- Collaborate with designers, project managers, and production staff to meet schedules and customer expectations.
- Follow all company safety procedures and maintain an organized workspace.

Skills & Qualifications:

- 3+ years of CNC router operation and programming experience preferred.
- Strong woodworking and carpentry background. Acrylic fabrication experience a strong plus.
- Experience with CAD/CAM software and CNC programming.
- Ability to read and interpret technical drawings and shop prints.
- Experience creating custom fixtures, jigs, and manufacturing solutions is a plus.
- Strong mechanical aptitude and troubleshooting skills.
- Ability to work independently and manage multiple projects.
- Detail-oriented with a commitment to quality craftsmanship.
- Ability to lift up to 50 lbs and work in a manufacturing environment.

Preferred Experience:

- Cabinetmaking, architectural millwork, custom furniture, or display fabrication.
- CNC routers, nesting software, and vacuum table systems.
- Concept design and product development.
- Wood, acrylic, laminates, composites, and other fabrication materials.

Benefits:

- 401(k) & 401(k) matching
- Health, Vision, & Dental insurance
- Employee discount
- Life insurance
- Paid time off
- Referral program
